

A.O. SPEIGHT STEEPLEJACKS

Industrial Stack Specialists
Est 1937

AO SPEIGHT

EXPERIENCED AND TRUSTED SAFETY

WORKING AT EXTREME HEIGHTS

A.O. Speight Steeplejacks (Pty) Ltd established in 1937, has been a leading specialist in the field of industrial stack inspections, repairs and maintenance.

From humble beginnings, A.O. Speight Steeplejacks has continued to grow its legacy by providing specialist solutions to industrial clients with an impeccable safety record, across Southern Africa.

We have decades of specialist experience in working at heights and have developed the right skills in areas which are considered to be very difficult or requires highly trained teams where safety is of the utmost importance.

A.O. Speight Steeplejacks has developed specialist expertise and is currently focused on scaling up operations to serve an increasing demand from our clients for industrial stack inspections, repairs and construction as well as regular maintenance support.

We are proud of our portfolio of key clients in the industrial, refinery and petrochemical, mining, energy and pulp industries including Sapref, Engen, Anglo American, Hulett's, Illovo and Impala Platinum, to name a few, and we have an established track record of successful completed projects.

We have developed strong business relationships with our key clients built on trust, expertise and experience, quality of workmanship and safety.

SPECIALISED STACK INSPECTIONS, REPAIRS AND MAINTENANCE
HIGH WORK, ABRASIVE BLASTING AND INDUSTRIAL COATINGS

SPECIALISED SERVICES

SAFETY FOCUSED

AO SPEIGHT

As specialists at working at heights we have expanded our expertise and developed various services for industrial and commercial industries including refineries, petrochemical, pulp, mining, infrastructure and renewable energy.

We offer a range of specialized services to tall structures and industrial chimneys where access is considered very difficult and safety is critical at all times. Our teams have vast experience in all industrial environments and have developed a structured approach to planning and completing projects for our clients.

The following key competencies and services are offered to our clients.

- Concrete spall repair
- Inspections and Installations
- Re-coating of surfaces
- Repairs to steel
- Brick re-lining on chimneys and stacks
- Repair to fibreglass surfaces
- Sealing of expansion joints and cracks
- High-pressure cleaning
- Industrial waterproofing
- Sandblasting
- Advanced drone inspections
- Lightning Protection System testing, repairs and maintenance
- Servicing, repairs and maintenance on air craft warning lights
- Industrial Coatings

We have an excellent safety record and have teams of experienced and highly trained specialists at working at heights.

All equipment is regularly inspected by qualified lifting machinery inspectors as safety is our number one priority at all times. All projects are carefully planned and attention is given to inspect equipment daily and to monitor all safety measures on-site.

We use highly specialized height access equipment platforms and temporary laddering systems, which can be assembled at any elevation.
